

New Bottle chiller

User's Guide

Introduction

1. Keeps bottle chilled in Open air.
2. Ok for bottle sizes 750 ml to 2.25 Ltr.
3. Washable and reusable many months.
4. Hygienic, avoids wetting from water of melting ice.
5. Works on all liquids in bottle beer, wine, coke, butter milk, mineral water etc.
6. Spare ice packs supplied to extend cooling for many hours.
7. Consume at your pace. Pour beverage in glasses as and when desired.

How to use

1. First step is to hydrate the 4 dry paper thin sheets in your packs.
2. Take a small tub about 16" dia with luke warm water in it. Dip in the Easy Ice sheets. Being light sheets remain floating on water. To dip them put water filled mug on the sheets. Let the sheets remain dipped fully for 20 minutes or more. The sheets will absorb water automatically and each sheet become 2 cm thick and weigh about 450 gm.

HYDRATION

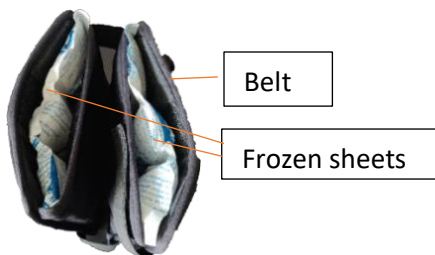

3. . Freeze Sheets till they get ice hard. Hydration is required only once in the beginning

Freeze

4. Insert two frozen sheets in the belt. Other two sheets keep in freezer for replacement later when sheets in belt get soft.

Belt with frozen Ice packs

5. Put the refrigerated Bottle in the center of belt. Tighten the velcro strap on the bottle. If the bottle is not already chilled, one can still insert the bottle in the bag and wait some time.

After some Hours, Ice packs will warm up to surrounding temp.
Replace the ice packs with ice packs in freezer. Replace the Ice packs removed in freezer. The spare ice packs enable extending bottle chill duration.
