

# Mold Cooler Machine

**Cooler machine with Aluminum plate on top to cool rubber molds after wax pulling**

**Front of the Box with temperature controller**

## The Indotech Machine:

Mold cooler machine has a 14 x 5 inch aluminum plate on top. The Al-plate is cooled with 230 V single phase power supply with a temperature controller. The plate cools to about 11 C in about 15 minute in wax room ambience of about 24 C. The Al-plate can accommodate total 8 molds of 3x2 inch each. Mold after wax pulling are placed on cold plate and are cycled on FIFO basis.

## Key Benefits:

1. Minimise wax model deformities, repair rejections after casting and gold losses.
- 2, Minimise gold weight overshoot.
3. Reduce number of rubber molds required for a production order.

## How to Use the Indotech Mold Cooler Machine:

The indotech Mold cooler Machine is extremely easy to use. Plug it in socket and let Al-plate cool in about 15 minutes and its ready to use.
