## About the Machine:

- This is the latest improved model.
- One can use wax as received from suppliers. No need to crush wax granules in smaller sizes.
- Hopper for wax is eliminated.
- It's specially developed for producing large metal mold wax items.
- Use metal molds to reduce up to 30 % gold weight even for 30 gm gold items.
- Mold size can increase from standard 63x42x50 to 85x65x120 mm and more.
- Consistent weight wax models free from non-fills, air bubbles, extra wax or shrinkage.
- Automatic machine cycle with Hydraulic clamping.
- Compact Table Top machine 24" X 24".
- Electronic control on temperature and time parameters.
- Maintenance free machine, working 24X7.
- We provide overall support to set-up jewelry production using Metal Molds.
