Vertical Sprue Cutting Machine

Details of the Machine:

- Heavy duty, high productivity machine for continuous working.
- Provides for adjustable gap between blades. Operation by foot pedal.
- Easy to work portable machine, measures 8"x4" at base.
- Working on hydro-pneumatic cylinder, designed to provide high cutting force.
- Long lasting cutting blades with edge protection, give minimum 35 % more life.
- Blades supplied in two designs. One with double bevel edge for cutting from cast tree. Second specially designed blade for cutting small stub close to cast pieces. This minimizes metal on final casting.
- Works on compressed air at 75 to 125 PSI (5 to 8 Kg per Sq Cm).
- See video at Youtube link <https://youtu.be/9TtEEj9rapM>
